

TRACKSPARES

HEAVY EQUIPMENT PARTS

COMPANY PROFILE

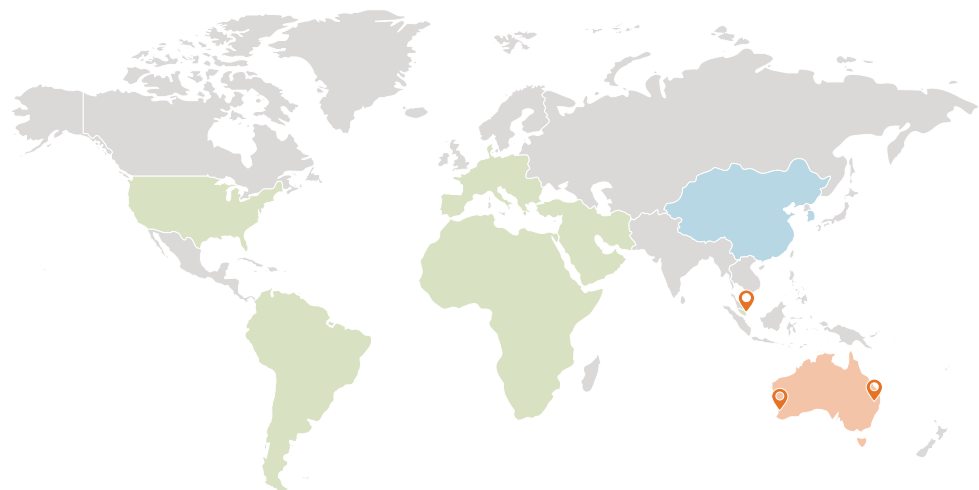

THE GENUINE ALTERNATIVE

Our Company

Trackspares are the heavy equipment undercarriage supply and rebuild specialists, servicing the civil construction, agriculture and mining industries. As the parent company of Trackex, Rossi and KBJ, our service and rebuild capabilities are complemented by an extensive range of quality aftermarket parts, components and G.E.T. We have a proven track-record of experience, innovation and competitive edge, offering you genuine cost savings and solutions, without compromising on quality.

- 📍 Trackspares offices: Toowoomba, Neerabup (W.A.) and Singapore.
- Manufacturing locations: China and South Korea.
- Supplier and distribution locations: Europe, The Middle East, the USA, Africa Malaysia, Brazil.

Location

With offices in Toowoomba, Queensland and Neerabup, Western Australia, and our extensive national dealer network, we can easily service both the east and west coasts of Australia. In addition to this, our 100% owned local and overseas manufacturing facilities, and international suppliers gives us greater control over cost, quality and input over production.

KBJ UNDERCARRIAGE

Our KBJ undercarriage product is produced in our 100% owned manufacturing facilities to our local specifications. This ensures our ever expanding range is specifically suited to our market, which we believe is the toughest in the World

KBJ offer the highest quality aftermarket undercarriage parts, allowing our clients the ability to make significant savings and reduction in cost per hour maintenance on equipment without sacrificing on quality. With undercarriage amounting up to 40% of the cost of running a machine, extending the life of machinery undercarriage can save significant project costs.

KBJ undercarriage parts are available for excavators, bulldozers, drill bases, crushers and screening plants. Our range includes track chains, track groups, grouser plates, track pads, sprockets, recoil springs, rollers, idlers and a full range of hardware, and covers the largest scope of applications and brands on the market.
