A note from the Boss

Brad Oats, Director

Hello and Welcome once again to 'On Track'. 2019 continues to fly by, and at Trackspares we have been busy turning significant opportunities into business through the hard work of our entire Team.

A major focus for our business is efficiency, as illustrated via our continued commitment to our 'Don't Let 1% Break The Chain' cultural initiative. The main message of this initiative is to ensure that even the smallest parts of what we do are done to the very best of our ability. Whether it is our Sales process, through our Workshop, or how our products are put to market via our Warehouse & Logistics Team, every aspect of our operation is under review and open for improvement at all times. No business is perfect and we are no exception, however the value of maintaining an approach to constant improvement of our processes, our skills and our products is evident month by month. We wear the '1%' logo with pride on our uniforms, and it is on display throughout the workplace. Most importantly, the values we have built this initiative on is front of mind with our Team, and this will only continue to benefit our valued clients.

DON'T LET

**BREAK
THE CHAIN**

Product wise, We have recently taken delivery of more D8N/R/T & D10N/R/T bulldozer track chains, & 12Tonne - 40Tonne excavator track chains from our KBJ factory. For the D8 & D10, we have both Genuine and Genuine Alternative™ seal options available, depending on your preference. Our range of parts to suit Articulated Dump Trucks offered via our Rossi Earthmoving Parts range continues to grow by the month. From suspension bushes, hitch & A Frame parts to OEM quality wheel seals for Caterpillar® & Volvo® applications, Trackspares continue to diversify our services to better serve all of our customers. You can find out more below on these products, but always make sure to call 1800 4 PARTS to take advantage of our range, quality and experienced sales staff.

Our D10 & D11 track frame overhaul program still sets the standard in the industry, and we are extremely proud of the efforts of our Trackex Workshop team. Their ability to meet deadlines whilst still putting forward an exceptionally finished product is second to none. We are also very proud of our before and after sales service, with our Scope Outline and Overhaul Report receiving positive feedback from many clients. If you are looking for the complete solution for your track frame fleet overhaul program, call our Business Development Team on 1800 4 PARTS and arrange a time where they can bring you up to speed with our service.

Before I leave you to enjoy the latest edition of On Track, I want to highlight some of the things we are doing in the local community through our fantastic Trackspares BBQ Trailer. You can find us helping out at Toowoomba Valleys Roosters Junior Rugby League Club home games, and the Toowoomba Bears Rugby Club, with the proceeds of the sausage sizzle going back to the club as a helping hand with their fundraising efforts. You can see some photos below of our setup, and I am sure you'll agree it looks great! We have some big plans in 2019 for our Community Engagement Program, so stay tuned here at On Track, via our website, and our social pages for more information.

Thanks for your interest in On Track, and for your continued business.
